FOR IMMEDIATE RELEASE

CRS BECOMES LOCAL CERTIFIED CRESTRON DEALER

CRS Building Automation Systems, Inc. is Pleased to Announce the Addition of Crestron Products to its Line of Service Offerings

Crestron is the world's leading manufacturer of advanced control and automation systems, innovating technology and reinventing the way people live and work. Offering integrated solutions to control audio, video, computer, IP and environmental systems, Crestron streamlines technology, improving the quality of life for people in corporate boardrooms, conference rooms, classrooms, auditoriums, and in their homes.

Below are just a few of the product lines that Crestron offers, and how they can benefit your company:

Crestron's GreenLight® fits into many companies' Green Initiatives and goes along with LEED standards. GreenLight delivers complete building management for maximum energy and operational efficiency. Only Crestron can monitor, manage, and control all the technology throughout the entire facility both centrally and globally. Crestron GreenLight technology provides total environmental control to conserve energy and lower costs by combining automated dimming and daylight harvesting with power switching and load shedding. Crestron touchpanels offer a global view and management of all systems and devices building-wide from a centralized command center, or local control from touchpanels in each room. You can monitor and control HVAC, audio/video distribution and presentation systems throughout the building from the same Crestron touchpanel.

Crestron's RoomView® Server Edition is a multi-user resource management program built on Microsoft® .NET technology, offering global room scheduling, monitoring, controlling, and reporting of Audio-video resources and environmental systems. RoomView provides an efficient point-and-click interface and a simple "at-a-glance" view of the entire control system network. Delivering both real-time PC and web-based clients, RoomView Server Edition allows facility managers, media directors and IT specialists to have the best of both worlds - unmatched real-time control and cross-platform accessibility. RoomView Server Edition integrates seamlessly with Microsoft® Exchange Server and the full line of Crestron devices to ensure that every room is connected.

CRS Building Automation Systems, Inc. is a distributor of all Crestron Products. We have promoted Emmanuel Darby to assist our customers with these needs. Please feel free to contact him if you have an interest in Crestron products and would like more information or an on-site needs assessment. He can also assist you with CRS' wide array of product and service offerings including access control, fire alarm, security, CCTV and more. His contact information is below:
