# Access Control Realities

## Card Enrollment/Deactivation

Your systems administrator will likely have monthly, weekly or even daily contact with this aspect of your access control system. Our approach to access control ensures your administrative ease.

---

## Scheduling System Functions and Events

Once installed, the system's door schedules and related external events (e.g., timed activation of lighting or elevator control) may need to be adjusted periodically. Our systems are designed with this in mind. Functions and events will be clear and concise for your administrator.

---

## Database Management

In today's workplace, employee turnover is a fact of life. Your system's database should be able to keep pace with your company's demands. You can count on us for system that will make database management an easy task.

---

## System Expansion

Floor plans change, new door access requirements emerge, and department heads will surely demand additional security. We will work with you to ensure that you plan ahead and leave room for your new system to grow as your security needs grow.

Our approach to access control ensures your administrative ease.
